PROJECT EXPERIENCE

AuraCare Lite | Independent Product & Workflow Project

- Coordinated end-to-end planning and development of a publicly deployed web application, managing feature priorities, project documentation, timelines, and release planning from concept through launch.
- Organized product requirements, workflows, and system documentation for 12+ planned application features using Notion and AI-assisted productivity tools to improve project visibility and execution.
- Coordinated iterative development, testing, deployment, and updates through GitHub and Vercel while maintaining structured documentation and project tracking throughout the product lifecycle.

Grow with Google Project Collaboration

- Served as team lead and primary presenter for a collaborative project management initiative, coordinating communication, organizing deliverables, and maintaining workflow alignment across team activities.
- Developed polished visual presentation materials using Google Slides and Notion, translating project initiation concepts into clear, audience-focused communications.

Community Carnival Fundraiser Project

- Managed scheduling, stakeholder outreach, donation coordination, and event logistics for a community fundraising carnival benefiting MUST Ministries.
- Assisted with project planning documentation, including work breakdown structures (WBS), Gantt chart coordination, and communication planning activities.

Selected Achievements

- **Reduced recurring operational delays by 24%** through workflow redesign and scheduling improvements.
- **Coordinated 5 simultaneous operational projects**, aligning timelines, stakeholders, and deliverables across daily business operations.
- **Built and maintained centralized project and documentation systems** supporting nonprofit funding initiatives and stakeholder reporting.
- **Developed executive-ready presentations and project materials** that translated complex information into clear, audience-focused communications.
- **Planned, organized, and launched AuraCare**, a publicly deployed digital application demonstrating end-to-end project coordination from concept through deployment.
